

2022 Sustainability Corp Responsibility: Bob Blue - Transcript

At Dominion Energy, actions speak louder. And accountability matters. So we publicly disclose the progress we're making, and where we have room to improve.

In our Sustainability and Corporate Responsibility Report our Diversity, Equity, and Inclusion Report and others —you'll find a candid account of our performance and our plans.

While much is changing across the energy industry, one thing is constant for Dominion Energy — our corporate purpose to deliver safe, reliable, affordable and sustainable energy to our customers, while operating as an employer of choice and creating value for our shareholders.

As we carry out this purpose each day, we recognize the importance of accounting for our impact on society and the environment. The goal of these reports is to do just that. They provide transparency on how we operate our businesses, while pursuing our vision to become the most sustainable energy company in the country.

Environmental protection is a crucial piece of that. So we're slashing emissions, building more renewable energy, and investing in new technology as we lead the way toward the clean-energy future. We've made tremendous progress, and we're closing in on our goal of net zero carbon and methane emissions by 2050.

At the same time, we're investing in communities — especially those that are disadvantaged or have been historically underrepresented. Through energy assistance, grants to nonprofits, job training programs and meaningful dialog with our neighbors, we're taking concrete steps to ensure that nobody gets left behind, as we move forward.

We're also investing in our people: making our workforce more diverse, and our workplaces more equitable and inclusive. We want to hire top talent, provide an environment where all people feel welcome bringing their authentic selves to work, and enable all of our colleagues to achieve their full potential.

As always, we remain focused on our core mission of serving our customers by keeping the lights on and the gas flowing — safely, reliably and affordably. Exciting changes are happening in the energy industry, and Dominion Energy is driving many of them.

But for us, two things will never change: our commitment to our customers, and our dedication to our sustainability goals. Thank you.
